

## **Advanced Health Careers**

-Career assessments and aptitude tests to see where their skills and desires best fit within the medical field.

-Cover letter and Resume building which will put them on a professional path.

-Research on several jobs that the students are interested in within the medical field. Once the selections are narrowed to three the students will put the research in a format that they can present it to the rest of the class.

-Educational goals essay that hopefully helps put the students education into perspective.

-Hospital tours that give the students a chance to see the workplace and how each section of the hospital operates and functions.

-CPR

Main objective:

**Job Shadowing** – the students pick 3 areas that they would like to job shadow. I organize these shadows and set up times for the students to participate. The students job is to be courteous, attentive, and hopefully learn more about a profession that interests them. After the shadow the student must reflect on the experience in written word for the final grade.

2<sup>nd</sup> Semester – CNA classes through Northeast College

Students work with a professor to complete an entire college credit CNA class. At the end of the class the students must attend Northeast for a day and test out of the material before becoming a Certified Nurses Assistant.
